**CLOSE CONTACT / NO SYMPTOMS**
(resulting in a negative COVID-19 test)

As soon as you know about a potential exposure, quarantine away from others in your room.

Call Student Health and Wellness (SHW) to review your exposure and potential testing needs.

**QUARANTINE**

Last close contact with person with COVID-19*

**QUARANTINE**

**NEGATIVE TEST RESULT**

DAYS 8 9 10

Around 9 days after your exposure, get tested for COVID-19. If your test is negative and you continue to not have symptoms, you still need to quarantine for a total of 10 full days since your last exposure. You may end quarantine on day 11.

**PLEASE NOTE:** These timelines are examples.

**CLOSE CONTACT / NO SYMPTOMS**
(resulting in a positive COVID-19 test)

As soon as you know about a potential exposure, quarantine away from others in your room.

Call SHW to review your symptoms and potential testing needs.

**QUARANTINE**

Last close contact with person with COVID-19*

**QUARANTINE**

**POSITIVE TEST RESULT**

DAYS 8 9 10

If you have never had any symptoms, you can end isolation after at least 10 full days have passed since the day of your first positive test result.

**SYMPTOMATIC**
(resulting in a positive COVID-19 test or developed symptoms while on other timelines)

As soon as you develop symptoms, quarantine away from others in your room.

Call SHW to review your symptoms and potential testing needs.

**QUARANTINE**

**POSITIVE TEST RESULT**

**ISOLATION**

DAYS 8 9 10

The day your symptoms began

**ISOLATION**

**DAY 10+**

You can end isolation after THREE things occur:
1) at least 10 full days have passed since the date of your positive test, 2) you’ve had more than (or equal to) 24 hours of no fever without the use of fever-reducing medication, and 3) other symptoms have improved.

Occasionally, isolation is extended based on a medical situation.

**IF SYMPTOMS DEVELOP** after your positive test result and while you are already in isolation, your isolation timeline resets and the day your symptoms develop is your new isolation start date.

**UVA PREVALENCE TESTING**
(residence halls, satellite clinic, + saliva testing)

**POSITIVE TEST RESULT**

**ISOLATION**

DAYS 1 2 3

**DAY 3**

**DAY 10+**

You can end isolation after THREE things occur:
1) at least 10 full days have passed since the date of your positive test or symptoms first appeared, whichever is longer, 2) you’ve had more than (or equal to) 24 hours of no fever without the use of a fever-reducing medication, and 3) other symptoms have improved.
