**CLOSE CONTACT**

Some examples of close contact with a person who has tested positive for COVID-19 include:

- being less than six feet from them for at least 15 minutes (e.g. having lunch or being part of a gathering with them);
- living with them;
- providing care for them; or
- having exposure to respiratory secretions (e.g., being coughed or sneezed on, sharing a drinking glass or utensils, kissing) from them.

A person with COVID-19 is considered to be contagious starting from 2 days before they become sick (or 2 days before they tested positive if they never had symptoms) until they meet the criteria to discontinue isolation.

---

**situation**

“I am experiencing symptoms that are consistent with COVID-19.”

**what to do**

- **Self-isolate** in your dorm room or off Grounds residence
- **Follow the instructions** of the local health department if they have been in contact with you
- **Call Student Health and Wellness** at 434-924-5362 for further guidance related to your new symptoms

---

**situation**

“I have no symptoms but was in close contact with a person with COVID-19.”

**what to do**

Distance yourself from others, including housemates. If the local health department calls you, answer the call. If you do not hear from the health department within 48 hours, contact Student Health and Wellness at 434-924-5362 for further guidance.

---

**situation**

“I know someone with COVID-19, but I don’t have symptoms and I don’t believe I was in close contact with them.”

**what to do**

Continue activities as normal, including standard prevention measures. These include wearing a face covering, maintaining physical distance from others outside your household, and frequent use of hand sanitizer/hand washing. The health department will reach out to you with more recommendations if you are identified as a close contact—please answer the call.

---

Call 911 or go to the nearest emergency room if you are:

- Having trouble breathing
- Experiencing persistent pain or pressure in the chest
- Experiencing new confusion
- Having trouble waking up or staying awake
- Experiencing bluish lips or face
- Having any other symptoms that are severe/concerning
